Botanically-infused fungistatic & insecticidal spray for all types of plants

For indoor & outdoor use on Flowers, Houseplants, Trees, Fruits,
Vegetables and Shrubs.

- Protect against Powdery Mildew, Rust & Brown Spot
- Reverse foliar fungal infections and restore plant health
- Deter mites, aphids & whiteflies
- Leaves no trace residue
- Promotes the photosynthetic process for more vigorous growth
- Safe for use in organic production
- **Plants love it!**

CAUTION: KEEP OUT OF REACH OF CHILDREN

Net Contents: 1 GALLON (3.8L)

DIRECTIONS FOR USE

DO NOT DILUTE. Diluting will make product ineffective. Spray plants when dry. Do not spray if precipitation is expected within 2 hours. Lightly but thoroughly coat all surfaces of the plant, including the underside of leaves. Reapply once per week after sprouts emerge. For knockdown of small insects, molds or mildews, apply three times in one week (days 1, 3, 7), then return to normal weekly routine. Plant Protectant is safe to spray through harvest.

General Information:

Plant Protectant may be sprayed via any type of spray applicator. Electrostatic sprayer recommended for best results. Adjust spray nozzle to fine mist setting before use.

Plants must be free of any type of oil, wax, powder or other coating that would prohibit material adhesion to foliage. If using Plant Protectant in conjunction with such a "coating" product, Plant Protectant will be ineffective.

Storage & Disposal: Store out of direct sunlight. Do not allow product to freeze. Once opened, product can be stored for up to 12 months. Keep all products away from children and pets. Recycle empty container or dispose of appropriately.
